DETAILED ACTION

Election/Restrictions

1. Claims 1, 3-8, 21, 24-27 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 9-20, 28-35, directed to the process of making or using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 9-20 and 28-35 hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in Paper No. 07/30/2003 is hereby withdrawn.

Allowable Subject Matter

2. Claims 1, 3-21 and 24-35 are allowed.
3. The following is an examiner's statement of reasons for allowance:

A search of prior art did not disclose a cholesteric layered material or a cholesteric pigment and a process of production of such a material comprising a combination of structural elements, more specifically:

(a) *Three-dimensionally cross-linked aligned cholesteric layer*, wherein the cross-linked cholesteric layer does not exhibit any color shift which can be induced by external stimuli selected from the group consisting of changes in the temperature of the layered material, the action of diluents on the layered material and combinations thereof, as recited in claim 1.

(b) *Three-dimensionally cross-linked aligned cholesteric layer*, wherein the three dimensionally cross-linked cholesteric layer does not exhibit any color shift which can be induced by external stimuli selected from the group consisting of the indicated parameters as recited in claim 3

(b) *A cholesteric pigment comprising one three dimensionally cross-linked, aligned cholesteric layer* having a mean particle size in the range from 5 to 50 microns and a thickness of from 0.2 to 5 microns wherein the cross-linked cholesteric layer exhibits no visually evident color shift.

The cited prior art teaches the use of a device produced by a polymerization-induced phase separation (PIPS) technique that is not three dimensionally cross-linked as described in the evidence document submitted by the applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

4. Applicant's arguments, see Remarks, filed 03/12/2004, with respect to claims 1 and 8 have been fully considered and are persuasive. The rejection of 12/15/2003 has been withdrawn.

In addition, the Examiner has considered the additional evidence submitted by the applicant (at the request of the Examiner) regarding the

polymerization-induced phase separation (PIPS) and the withdrawal of the previous office action is based on this evidence.
